

TEXTILE INDUSTRY

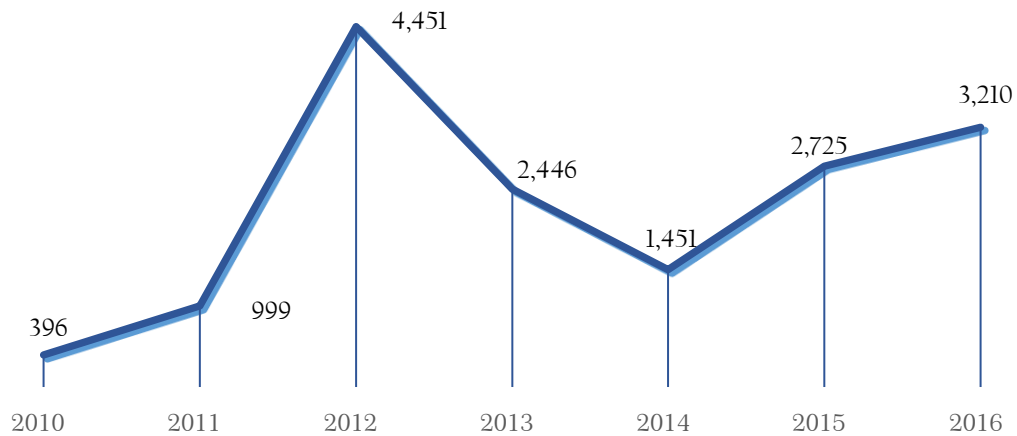

Textile Industry

Low labor costs, political stability, availability of raw materials and cheap industrial land are attracting investors who are seeking alternatives to China's rising wages: the average textile worker wage in China has risen to \$247 USD a month, in comparison to \$140 in Indonesia.

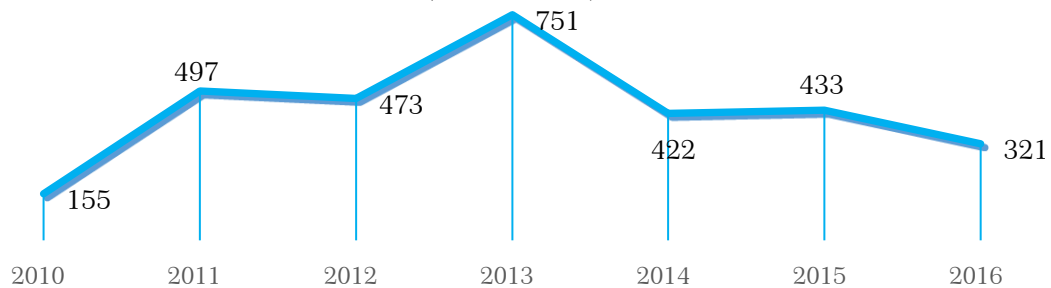

Indonesia Textile Association (API) claimed 80% clothes global branded products have been made in the country. It basically shows that Indonesia textile industry has been renown globally by the world.
